

Permanently Remove CWP Security Popup

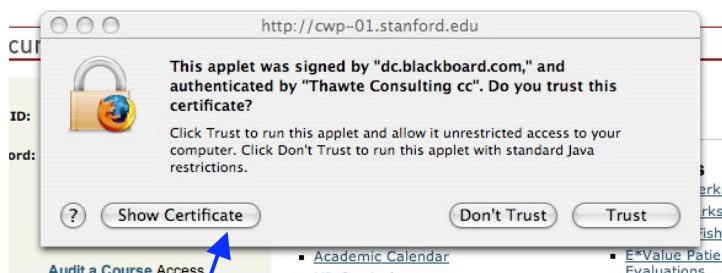

When you log into the CWP, you'll be prompted to accept either an application's digital signature (PC) or an applet's certificate (Mac). If you simply click Run/Trust, this will occur each time you log on. Follow these instructions to accept the signature/certificate permanently. If you have any questions, email cwpsupport@lists.stanford.edu.

On PC (Firefox or Internet Explorer)

First, make sure this box is checked, then click the Run button.

On Mac (Firefox or Safari)

First, click here.

Next, check "Always trust."

Finally, click the Trust button.
