

FRONTIERS IN AGING

MONDAYS AT 4:00 PM IN THE MUNZER AUDITORIUM

**MONDAY,
SEPTEMBER 19, 2016**

Roshelle Buffenstein, PhD

Calico Life Sciences

*The bare essentials of aging;
Lessons learnt from the long
lived naked mole-rat*

**MONDAY,
OCTOBER 10, 2016**

Paul Robbins, PhD

The Scripps Research Institute

*Development of therapeutic
approaches to extend health
span*

**MONDAY,
NOVEMBER 7, 2016**

Peter Adams, PhD

University of Glasgow /
CRUK Beatson Institute

*Epigenetics of aging and
cancer – from mechanisms to
therapies*

**MONDAY,
DECEMBER 12, 2016**

Gordon Lithgow, PhD

Buck Institute for Research on Aging

*Robust and reproducible
interventions in aging*

**MONDAY,
FEBRUARY 6, 2017**

Tom Misteli, PhD

NIH, National Cancer Institute

*Genome cell biology: from
fundamentals to disease*

**MONDAY,
MARCH 6, 2017**

Yousin Suh, PhD

Albert Einstein College of Medicine

*Enhancer mechanisms of
human aging and disease*

**MONDAY,
APRIL 3, 2017**

Gerald de Haan, PhD

University of Gronigen

*Epigenetic and microRNA
controlled self renewal
mechanisms in normal and
leukemic hematopoiesis*

**MONDAY
MAY 1, 2017**

Maria Blasco, PhD

Spanish National Cancer
Research Centre

*Telomeres as therapeutic
targets for aging*
