

Dear Doctor:

Thank you for your interest in our Clinical Neurophysiology Fellowship Programs. Our department has three different fellowships available, each with a different emphasis.

The Clinical Neurophysiology and Intraoperative Neurophysiologic Monitoring (IONM) Fellowship is a one year fellowship which involves training in several different areas in clinical neurophysiology. The fellow is trained in EMG, nerve conduction studies, evoked potentials, and in all aspects of intraoperative neurophysiologic monitoring. The techniques utilized in the operating room include evoked potentials, EMG, EEG, TCD, spinal cord stimulation and cortical and subcortical mapping. In addition, the fellow also receives training in the use of botulinum toxin injection for treatment of neurologic disorders. Participation in ongoing clinical research is also required. The option to extend the fellowship for two years is also available. For further information, please contact Leslie Lee, MD at (650) 723-5184 or via e-mail at lhlee@stanford.edu.

The EMG and Neuromuscular Diseases Fellowship is a one year fellowship which emphasizes training in EMG, nerve conduction studies, and neuromuscular diseases. The fellow divides his or her clinical duties between Stanford and California Pacific Medical Center in San Francisco. For further information, please contact Leslie Dorfman, MD, Director, EMG and Evoked Potential Laboratories at (650) 723-6888.

The EEG/Epilepsy Fellowship is a one-to-two year fellowship in EEG and epilepsy. The fellow participates in all aspects of the Comprehensive Epilepsy Center at Stanford University, including inpatient and outpatient epilepsy evaluation and management, participation in ongoing clinical trials, and training in the interpretation of adult and pediatric EEGs, electrocorticography and WADA testing. For further information, please contact Robert Fisher, MD, PhD, Director, Stanford Comprehensive Epilepsy Center at (650) 725-6648.

If you are interested in applying to our Clinical Neurophysiology and Intraoperative Neurophysiologic Monitoring Fellowship, we request a cover letter mentioning your career goals and interest in pursuing an IONM fellowship, a minimum of three letters of recommendation, a copy of your CV, and a completed application form which is enclosed.

These may be submitted electronically, and/or mailed to our attention at Stanford University Medical Center, 300 Pasteur Drive, Room A343, Stanford, CA 94305-5235.

Please feel free to contact us with any questions.

Sincerely,

Leslie H. Lee, MD
Clinical Associate Professor
Neurology and Neurological Sciences
Stanford University School of Medicine

Jaime R. López, MD
Associate Professor
Neurology and Neurological Sciences
Director, Intraoperative Neurophysiologic
Monitoring Program
